

Ideal Ball & Egg Holder by Fabric Manipulation

-----oOo-----

Description: *Strong enough to hold a billiard ball yet gentle enough to hold a blown chicken egg, the Ideal Ball & Egg Holder is preferred world-wide by the professionals. There is none finer available! The Ideal Ball & Egg Holder is made of specially coated brass and has a sturdy nickel-plated steel fastener. The special black coating on the holder not only protects objects from getting scratched by the metal, but it also gives a secure, slip proof grip that is more reliable than other holders!*

That's the ad copy, but what can I say? It's everything the description says and more. 😊

This is a very well made high quality accessory that for many years has not been available on the market. I was thrilled to no end when I first saw this item. 😊

Easy to use, and talk about a secret weapon!
Spectators just cannot imagine *where* a full size honest to goodness

billiard ball could have possibly come from! Gotta love that. 😊

It easily attaches to your attire, and can be adjusted as you may desire.

I feel the best part is its reliability.

This is so well constructed that you never have to worry about the ball falling out prematurely, and that my friend is half the battle.

If you're looking for a device to hold a ball or egg to produce during a performance, look no further, you've found the best. Highly recommended. 😊

My rating: 🍷🍷🍷🍷🍷
